

## **Consumer Lending Systems Consolidation--Value Proposition**

**Client Need:** A technology services provider requested assistance with the development of a business case to capture the value for a bank client to move from five consumer lending platforms to a single technology solution.

**Solution:** BenchMark qualified specific feature/functionality from the single technology solution and quantified operating expense reductions to the client after conversion to a single platform. Gains were also identified in the areas of risk avoidance and customer service delivery.

**Results:** BenchMark identified annualized recurring savings of approximately \$22 million from consolidation to a single technology solution.
