

Provision of Credit Policy Recommendations

Client Need: A new start Automotive Finance Company with dealer and retail portfolios required a Credit Policy structure which could be implemented and adapted as business grows.

Solution: BenchMark provided a credit policy document, including anticipated measures and KPI's as a base document for the start-up phase. Refinement will take place as business is written and matched against the assumed client criteria used in development of the policy.

Result: Client has commenced business with the policy we developed for them.
